TECHNICAL SPECIFICATION FOR: SUPPLY, INSTALLATION AND INTEGRATION OF WIRELESS COMMUNICATION SYSTEM FOR TELEVISION & RADIO BROADCAST FACILITIES

1. BACKGROUND

Currently, the SABC's principal activities comprise of television and radio broadcasting utilising 19 radio stations and 5 television channels. The launch of SABC channels on the DTT/DTH platform is a strategically critical project for the SABC which not only positions the SABC as a multi-channel, multi-platform content provider operating in the digital domain but also provides consumers with more choice with free-to-air services and thus providing an opportunity to aggregate revenue through advertising and sponsorships.

TVBR(OB) has set as one of its key deliverable to be the host broadcaster of choice in Africa. Host broadcast means any entity appointed by the event organisers to provide services in connection with the production of the basic audio-visual feed (or any supplemental feed) of any ancillary event. This prevents having too many cameras at the event. That means all broadcasters receive the signal from one central broadcaster.

As there are many sessions happening at the same time at an event, the small crew sent by broadcasters is unable to attend all the sessions. For this reason when providing Host Broadcast services to clients, one of the requirements is to allow other broadcasters, both TV and Radio to access all the material via the intranet facilities provided by external contractors often appointed by the client. This material needs to be provided in different formats as agreed to in negotiations with the clients. One weakness that has been identified is that the SABC does not supply this service very well as they use linear methods. The clients request a file based method of supplying this.

The number of users at times spans over 100, depending upon the importance of the event. A simple web based system that does not need installation of software on the accredited broadcaster's machines, training or requires licenses keys to be installed is required. Access needs to be controlled via Passwords and User Names for security and billing purposes. In order to protect the broadcast, the proxies and footage needs to be stored on storage that is isolated from the Broadcast systems. The Host Broadcaster is also required to distribute broadcast signals to a number of monitors around the venue.

2.0 SABC REQUIREMENTS AND SCOPE OF SERVICE

Through this RFP, the SABC require the following outcomes:

- 2.1** SABC requires a total of 13 IP based wireless networkable communications systems, six (6) integrated systems for OB1J, OB2J, OB3J, OB6J, MPU1J and MPU1K because these units

already have a communications mainframe hence require an interface card to be acquired to allow the mainframe to link with the belt-packs

- 2.2 The seven (7) standalone systems will be for OB5J, MPU1D, DSNG1, DSNG2, DSNG3, DSNG4 and DSNG1K because these units do not have a communications mainframe
- 2.3 The standalone systems need to be flexible so that future integration to a digital communications mainframe is possible.
- 2.4 The systems should be IP compatible to allow ease of use, ease of integration with new technologies which ultimately allow for improved efficiency
- 2.5 The radio communications systems should be AES67 compliant, a component of SMPTE 2110 which is the IP standard SABC is intending to use in future
- 2.6 The system must operate in a globally licence free frequency range
- 2.7 The system must have a minimum of 200m range per belt-pack
- 2.8 The system must have a high sound quality, minimum 6kHz audio bandwidth
- 2.9 Must integrate with existing communications infrastructure
- 2.10 The systems must be able to work with the existing communications frame
- 2.11 Each unit must have a minimum of 4 belt packs.
- 2.12 On some broadcasts we link with other OB units so we need a system that can network seamlessly and easily between OB units
- 2.13 We need the wireless communications for the DSNG's as these units are now doing more and more broadcasts where radio communications are required for the floor managers.
- 2.14 The system must be scalable to allow for increased range, increased number of belt-packs and remote connectivity.
- 2.15 The system must come in a light weight flight cases for belt packs, headsets and charger

3. SCOPE OF SERVICES AND TECHNICAL SPECIFICATIONS

The equipment SABC is requesting must interface with the following existing infrastructures:

- Riedel Artist 128 (OB1J, OB2J, OB3J, OB6J)
- Riedel Artist 32 (MPU1J & MPU1K)
- Analog 4-Wire ports (OB5J, MPU1D, DSNG1, DSNG2, DSNG3, DSNG4, DSNG1K)

3.1 Bidders are requested to respond to the tender in the following format:

- 3.1.1 A point-by-point response is required, i.e. a comment for each point or paragraph that is associated with the numbering should be made.
- 3.2.1 The response to technical requirements must state “Comply” or “Non-Comply.” The bidder must specify how the system/product makes provision for each aspect as stated below, including the page number of referenced materials to clarify the response.
- 3.3.1 **A “Partially Comply” statement, non-response, or response without detail will be seen as “Non-Compliant”.**

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1.0 This Standard Bidding Document (SBD) must form part of all bids¹ invited.
- 2.0 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3.0 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4.0 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5.0 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for SABCs who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
